TRIMLIGHT IS REVOLUTINIZING EXTERIOR LIGHTING!

Permanent LED Lighting for your Home or Business

YOU CONTROL MILLIONS OF COLORS & PATTERNS

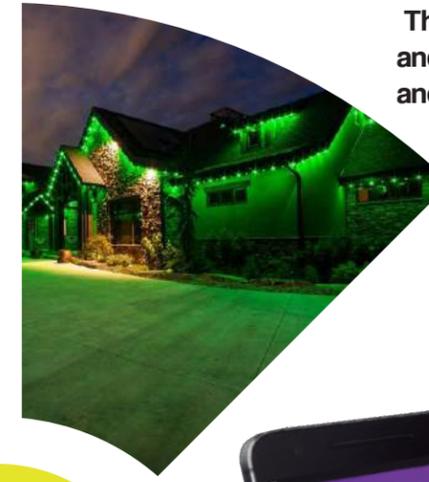

Never Hang Christmas Lights Again!

Trimlight installs patented LED technology designed to last 50,000 hours and use only a fraction of the energy of conventional bulbs.

Trimlight channel is made from high-quality aluminum that is available in a variety of colors to ensure the best match to complement the architecture of your home or business.

Trimlight is professionally installed by experienced and insured contractors. If you live in an HOA neighborhood, we can assist in submitting your application for approval. On request, we can also attend board meetings on your behalf.

The TRIMLIGHT Select Plus System allows you to have multiple, distinct "Zones" and control up to 16 million colors with different patterns, levels of brightness, and rates of speed within each "Zone".

It's easy and it's fun!

You choose a program using our Apple or Android app on your smart device from inside your home via a 2.4Ghz WIFI controller.

The controller is protected in a weatherproof box which can be mounted in your garage, closet, or even outside.

In addition to 180 default programs, you can create your own unique combinations utilizing a palette of up to 7 colors and 9 patterns such as Rainbow, Stacking, Comet, Wave, Pulse, Snake, Chase, Inside Out, and Fade.

There is a built-in daily timer which allows you to set 2 calendar events per day, 365 days per year perpetually.

The App has a preset Library including Christmas, Thanksgiving, Independence Day, Valentines Day, etc.

You can easily create your own custom themes to celebrate birthdays, sports teams and school colors.

Trimlight channel is hardly noticeable; hides wires; and holds lights securely either 6", 9" or 12" apart – elegantly enhancing your home or business.
